

Model AC500

HEPA Air Cleaner
Residential Whole-House (GFI #4600)

Breathe Healthier

Remove Harmful Particulates From Indoor Air.

Installing a quality GeneralAire® HEPA Air Cleaner can reduce allergy and asthma symptoms, improve many chronic respiratory conditions and remove odors from your home's air.

How the AC500 Works:

Air from your furnace passes through two separate filters inside the AC500: a pre-filter with carbon (removes odors) and a HEPA filter (removes 99.97% of airborne particulates).

Details inside or go to: www.generalfilters.com/AC500

Install an air cleaner in your home to:

Remove odors and smoke:

Whether from cooking, hobbies, pets, garbage, or smoking, the AC500 will help eliminate annoying odors! In addition, tobacco products contain as many as 4,000 different chemicals; 50 of which are known to be cancer-causing carcinogens. Reduce smoke levels with the AC500.

Reduce allergy symptoms:

Pollen is a major allergen that can cause miserable symptoms such as a runny nose, itchy eyes, sneezing and more. Skin flakes, urine and saliva from pets can all become airborne.

Breathe easier and healthier:

Find relief from hayfever, asthma, chronic cough, wheezing, sneezing, runny nose, sore throats and other sinus problems.

Why Whole-House Air Cleaners Vs Portable Room Units?

See the top reasons below why a whole-house Air Cleaner is a better option for your home than a portable room unit:

	GeneralAire® Model AC500 Whole-House Air Cleaner	Portable Units
Provides clean air in every room of your house	Yes. You will benefit from proper humidification throughout your home.	No. You'll need to purchase a unit for every room in your house.
Quiet Operation	Yes. Your system will be so quiet you'll forget it's there.	No. Portable units can be noisy and take up space in your rooms.
Minimal Maintenance	Yes. Simply change the air filter media and bulbs every 6-12 months!	No. Filters must be replaced on a shorter term basis.

Selecting an Air Cleaner

There are several considerations when selecting air cleaner:

1. Size of your home.
2. Number Of HVAC systems in your home.
3. Your risk factors (smoke, pets, living near a highway, use of pesticides and bug killers, levels of mold and mildew, the climate, hobbies, pollen season, etc.).
4. Operation costs.
5. Special projects (home renovations can create extra dust and other particulates that float in the air).
6. Maintenance requirements.

GeneralAire® offers a full line of residential whole house air cleaners to meet your needs. Review our full product catalogue on www.generalaire.com to learn more. We recommend speaking with a licensed contractor for assistance with your IAQ selections and installations.

HEPA - The Best in Air Cleaning

HEPA: High-Efficiency Particulate Arrestance.

In the last decade, HEPA-technology air purifiers have been used to clean indoor spaces from homes to beauty salons to hospitals across the country. Because HEPA Air Filtration Systems combine HEPA filters with carbon-based materials, they stop mold spores, bacteria, viruses, pet dander and dust; and also help to eliminate harmful gasses and odors from your home. The air is cleansed and almost totally free from contaminants.

Environmental Protection Agency studies show we spend as much as 90% of our time indoors. Indoor air pollution is among the top five environmental health risks. In fact, indoor air can be up to 100 times more polluted than the air we breathe outdoors.

Model AC500

HEPA Air Cleaner
Residential Whole-House (GFI #4600)

HEPA - High Efficiency Particulate Arrestance

HEPA

- Classified by the Occupational Safety & Health Administration as the best in air cleaning.

HEPA

- Captures the smallest particles that other filtration systems often miss.

HEPA

- 99.7% efficient at removing particulates as small as 0.30 microns.

HEPA

- Used in computer rooms, medical and nuclear facilities, food, pharmaceutical and other industries requiring contamination control.

22" High

Easy Open Door

- Door latch "snaps" into place to create a secure seal.
- Unlatch and open to easily replace filter media.
- Simply slide old media out, and new media in! Takes seconds!
- Thick insulation on inside of door helps reduce noise and creates a tight seal.

Door Hinges

- Holds door firmly in place while replacing filter media.
- The door can be lifted off its hinges and removed for maintenance purposes.

Child Safety Switch

- Found just inside door, automatically shuts system off if door is opened.

Two Speed Motor Switch

- Found just inside door, allows you to select between normal filtration (200 CFM), or maximum filtration (300 CFM).

Inside the HEPA

- Pleated Pre-filter with Charcoal
- HEPA filter
- Child Safety Switch
- Speed Control
- Motor

Maintenance

Maintenance of your new GeneralAire® HEPA Air Cleaner is minimal. To ensure peak performance and reliable operation, simply replace your filter media: Pre-filter with carbon - every 6 months; HEPA filter - every two years. Go to www.generalfilters.com / support center / video library to view a video demonstrating how to change your filters.
